DETAILED ACTION

Request for Continued Examination

1. The request filed on August 16, 2006 for a Request for Continued Examination (RCE) under 37 CFR 1.53(d) based on parent Application No. 10/825,725 is acceptable and a RCE has been established. An action on the RCE follows.
2. Claims 1-25 are pending. Claims 22-25 are drawn to non-elected subjected matter. Claims 1-21 are examined with merit.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Makino et al. (US 6,552,130 B1) in view of Borden et al. (US 6,211,259) for the reasons adequately set forth from paragraph 6 of the office action of February 14, 2006.

Applicant's arguments filed August 16, 2006 have been fully considered but they are not persuasive. Applicants argue that there is not motivation to combine the teachings of Makino et al. (US 6,552,130 B1) with Borden et al. (US 6,211,259), because the teachings of Borden et al. deal with the adhesion between the surfaces of a polyurethane resin and its acrylic gel coat which has already been polymerized. However, applicants must recognize that an adhesive property has to deal with the interactions between the surfaces of at least two different substrates, such as the polyurethane and acrylic gel coat of Borden et al. If applicants argue that Borden et al. must disclose that the acrylic gel coat in the non-polymerized form in order to be combined, applicants must recognize that Borden et al. do not have any adhesive problem before the acrylic gel coat is polymerized.

Regarding applicants' argument that the claimed invention requires the phosphoric acid (the adhesion promoter) to be added while the claimed invention is still in the liquid form, applicants fail to recognize that the adhesion promoter of Borden et al. is added to the B-side liquid resin (col. 16, line 34-43) before the formation of polyurethane.

In view of the reasons set forth above, the examiner has a reasonable basis to believe that Borden et al. has provided or suggested disclosure to suggest the compatibility of phosphoric acid esters as adhesive promoters for use in acrylate resin.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
